The UNGPs Compliance Lab is aimed at all CSR, HR, compliance or procurement professionals who seek to gain a basic understanding of the current international and national expectations on CSR: the UN Guiding Principles on Business and Human Rights (UNGPs).

The UNGPs are a set of guidelines that enable companies to demonstrate that they respect human rights. Any company can now respect human rights, by communicating how they identify adverse impacts on human rights, and what they do to prevent and mitigate them.

**THE WORKSHOP**

This workshop provides an introduction to the practical and theoretical foundation of the UNGPs. The format of the workshops will consist of discussions, group exercises and presentations.

The following tools will be used during the course:

- The UNGPs Self-Assessment Tool
- The eLearning module ‘Managing Human Rights’

**OBJECTIVES**

The workshop enables participants to put international guidelines into practice - assessing their current CSR processes and activities against the new expectations set by the UN, OECD, EU and the Danish Government.

The main objective is to give each participant a solid understanding of how to implement the UNGPs in his/her own business.

**WHAT DO YOU GAIN?**

- Distinction and relation between the UNGC and the UNGPs.
- Capacity to develop a UNGPs aligned policy commitment.
- Understand the human rights due diligence procedure.
- Basic capacity to align your business conduct with the UNGPs.
- Outline of remediation through effective grievance mechanisms.
- One year access to the ‘Managing Human Rights’ eLearning module.
