- Minneapolis 37 - 38
- Goals 38
The past year has been a busy one for Siteimprove, both in regards to our Corporate Social Responsibility efforts and our company as a whole. Again we witnessed unprecedented growth, having increased our employee numbers from 185 in May 2015 to over 440 in May 2017. Along with our continued growth, we have taken a more focused approach to our CSR efforts by implementing more formal processes, expanding our efforts globally, and taking on more responsibility as a global advocate for an inclusive World Wide Web.

One way in which we continued to work hard to raise awareness about digital accessibility, and assist us in our goal of promoting a web that is accessible for all, was by hosting our largest accessibility event to date. On May 18th we celebrated Global Accessibility Awareness Day (GAAD) in Copenhagen with a huge not-for-profit outdoor event where a number of great guest speakers and experts donated their time to come along and educate and inspire the audience. It was a fantastic day and helped gain much needed awareness of digital accessibility. Members of the public, Siteimprove employees from around the world and web professionals heard from great minds such as Sir Tim Berners-Lee, inventor of the World Wide Web, and Jen nison Asuncion, Co-founder of GAAD.

Becoming a member of the World Wide Web Consortium (W3C), hosting the Global Accessibility Awareness Day event, and hiring the best experts in the field are all just small ways in which we continue to work towards our mission. At the same time, we have re-evaluated our CSR mission and goals, and have established local CSR committees in each of our offices, as well as implemented a global CSR Code of Conduct to ensure that we are working consistently as a company towards one goal. Quality over quantity will be the buzz words for the future, as we work together to be more strategic in our undertakings.

With many new people joining the company, it is with great happiness that we continue to witness a consistently high level of satisfaction among our employees. Once again, we were recognized as a great place to work in multiple locations. The Great Place to Work® survey named us in the top 10 best IT companies to work for in Denmark, and we even managed to move up one spot. In the U.S., we were named one of the Star Tribune’s Top
Workplaces in Minneapolis for the second year running.

I hope that you enjoy reading our latest CSR report, and that it may inspire you to join us in our mission of making the web better for all.

Morten Ersbøll Ebbesen,
Chief Executive Officer
Who
Siteimprove is an international software-as-a-service company founded in Copenhagen, Denmark, in 2003 by Morten Ebbesen, who is still CEO of the company today. Siteimprove transforms the way organizations manage their digital presence and delivers digital certainty for more than 5,000 customers across North America, Australia and Europe.

The majority of our 400+ employees work within our headquarters in the heart of Copenhagen and our Minneapolis office. However, we also have international offices in Amsterdam, Berlin, London, Oslo, Sydney, Toronto and Vienna. More than 25 different nationalities are represented in the headquarters alone, making Siteimprove an incredibly diverse workplace.

**Who benefits from Siteimprove’s services?**

We are a people-centric company driven by the desire to help customers act with digital certainty. The Siteimprove Intelligence Platform provides complete visibility and deep insights into what matters, empowering teams to outperform the status quo with certainty every day.

As the digital world becomes increasingly complex, it is more important than ever for organizations to maintain an error-free, consistent, up-to-date, and accessible digital presence. Siteimprove’s intelligent automation software has helped more than 5,000 organizations worldwide transform the way they manage and deliver their digital presence.

Organizations and companies with complex, resource-heavy websites particularly benefit from our services, as Siteimprove makes the daily web management process much more efficient. In the public sector, our customers are typically ministries, educational institutions and councils. In the private sector, our customers come from a variety of industries including finance, insurance, healthcare and more.
Siteimprove’s Products

We consider it a privilege to challenge each other and ourselves to think outside the box every day. At Siteimprove, we collaborate across departments and borders to innovate and improve our tools, and experiment with new processes to help make our product and service even stronger.

As our primary product, the Siteimprove Intelligence Platform is comprised of the Content Suite and the Analytics Suite, which provide intuitive insights that connect digital strategy to organizational goals.

The Content Suite offers organizations complete visibility into their digital presence, streamlining the content creation process and helping to create and maintain a positive user experience. With features like Quality Assurance, Accessibility, Response, SEO and more, customers can more effectively manage the quality, credibility and impact of their online content.

With the Analytics Suite, organizations can define and report on relevant KPIs and use real-time data to visualize the efficacy of their digital presence. An intuitive dashboard helps teams measure and track visitor behavior to make more informed decisions about site structure and content strategy. With Key Metrics, Behavior Maps, User Journeys, Feedback and more, Siteimprove Analytics provides team members with actionable insights that elevate their organization’s digital presence to new heights.

With tiered support plans that offers customers the right level of support when they need it, the complete Siteimprove Intelligence Platform is a comprehensive, intuitive way for organizations to be certain their digital presence operates exactly as intended.
Our Mission

Siteimprove’s mission is to make a better web for all. Our team remains dedicated to that mission while also developing new and innovative ways to streamline the creation and management of a reliable, accessible digital presence. Our mission permeates everything we do: It is evident in the product solutions we build, the support we offer, and the professional services and education we provide.
Human
Rights
Spreading the word worldwide for a better web

Global Compact Principles 1-2:

1. The company should support and respect the protection of internationally declared human rights
2. Ensure that the company does not contribute to the violation of human rights

As part of Siteimprove’s ongoing work to actively put digital accessibility on the public and private agenda and to support an inclusive web for all, we held several accessibility conferences around the world in the past year. We have also entered into official partnerships with accessibility professionals who share our passion for making the web better and accessible to all regardless of disability or level of technical expertise. Read about our efforts within digital human rights in this section.

As Siteimprove continues to grow, so too does our commitment to ensuring that we are doing our absolute best to also grow our efforts to meet our company mission of making the web a better place for all.

One way in we do this is by holding various conferences and hosting informative networking events all over the world that focus on highlighting digital accessibility, explaining what and why it’s important, and giving practical advice on how best to implement it.

In June 2016, our Accessibility Product Owner co-founded the networking group on digital accessibility “Interessegruppen for Digital Tilgængelighed” under the network “Design for Alle,” the Danish branch of Design for All Europe. The group consists of accessibility professionals and people with an interest in accessibility meet on a regular basis in the Copenhagen area.

Siteimprove has also awarded a number of prizes to the best and most improved websites, including “UX-prisen,” which was awarded in collaboration with our partner, the Norwegian Association of the Blind and Partially Sighted. E-helse in Norway, a public health portal, was awarded the prize for Norway’s best user experience by an expert panel looking at several accessibility criteria. In Denmark, we launched a competition for the local councils, challenging them to improve the accessibility
on their websites, which resulted in great improvements to public websites in Denmark.

Siteimprove participates in accessibility events for developers, and in September 2016, we hosted Copenhagen Frontenders Meetup. Developers are crucial in securing digital accessibility, as they produce and develop the code and the technologies behind the websites that we all use.

Our highly qualified accessibility consultants and partners continue to share their knowledge and experience to raise awareness about digital accessibility. In February and March 2017, we participated in the CSUN Conference on Assistive Technologies in California, and on May 18, we celebrated Global Accessibility Awareness Day by hosting an amazing event in Copenhagen where all Siteimprove employees participated.
Siteimprove celebrates biggest **Global Accessibility Awareness Day** in Copenhagen to date!
Since 2012, Siteimprove has been a strong supporter of Global Accessibility Awareness Day (GAAD), which is an annual advocacy day that aims to get people talking, thinking, and learning about digital (web, software, mobile, etc.) accessibility and people with different disabilities. GAAD occurs the third Thursday of May every year.

In 2015, Siteimprove celebrated the day by holding the world’s largest blind tandem cycling event in collaboration with the Danish Association for the Blind. This event was a great success and concluded with Siteimprove donating 100 tandem bicycles to the members of the community who had visual impairments.

Never wanting to rest on its laurels, Siteimprove pushed itself to contribute to this day in an even bigger and more educational way. World-famous inventor of the World Wide Web, Sir Tim Berners-Lee, along with respected accessibility experts from around the world, gathered in Copenhagen, Denmark, to celebrate the sixth Global Accessibility Awareness Day (GAAD) on May 18.

The not-for-profit event was well-attended and took place in central Copenhagen on a 16,000 m2 manmade island. Hosted by Siteimprove, the free event was enjoyed by over 1,000 members of the public, close-knit members of the global accessibility community and Siteimprove employees from the company’s nine global offices.

The day’s celebration started with welcoming remarks from Siteimprove CEO Morten Ebbesen, followed by a powerful keynote speech from Canadian Jennison Asuncion, who along with Los Angeles-based web developer Joe Devon, founded the now widely celebrated GAAD initiative. Asuncion, who is legally blind, explained what led them to launch the day, as well as his personal thoughts on the future of accessibility.
Comedy and advocacy duo Karl Groves and Billy Gregory, better known by their stage name “The Viking and The Lumberjack,” showed the audience that it’s okay to have a laugh and still be serious about accessibility.

Throughout the day, the local organizations The Danish Association for the Blind and Living IT Lab participated. The Danish Association for the Blind had a booth where participants could learn more about their specific competencies and services. Living IT Lab shared information about their IT solutions that help companies and organizations ensure accessibility from early user to launch.

VIM’s purpose is to promote the personal expression of wounded veterans and those with similar injuries through various activities. They set up an exercise field where they demonstrated the activities they do to strengthen their physical form, and held a series of friendly competitions against attendees.

Siteimprove employees who work within accessibility had a tent where they highlighted how Siteimprove helps organizations create accessible websites. While there, participants also had the chance to experience different empathy exercises such as Parkinson’s gloves.

A true highlight of the day was the second keynote speech by Sir Tim Berners-Lee, inventor of the World Wide Web. He shared his exclusive insights into how the idea for the web came about and how the medium positively helps those with disabilities stay connected.

GAAD ended with a panel session on “The Present and Future of Digital Accessibility” chaired by Jennison Asuncion. Among the panelists was Shadi Abou-Zahra, accessibility strategy and technology specialist from the World Wide Web Consortium (W3C), an international community led by Berners-Lee with the mission to lead the web to its full potential. Other panelists included Alejandro Moledo, New Technologies and Innovation Officer for the European Disability Forum; Timothy Creagan, Senior Accessibility Specialist for the U.S. Access Board; and Ralph de Rooij, Directorate-General for Public Administration at the Dutch Ministry of the Interior and Kingdom Relations.
Expanding our accessibility expertise

In the past year, we have established a number of roles in the organization specifically focused on digital accessibility. Not only are they the best at what they do, they also help us “walk the walk,” as three of them are legally blind and one has a visual impairment. Our new hires within accessibility include:

- **Accessibility Testers:**
  - April Sandquist and Jennifer VonYeast

- **Digital Accessibility Consultant and Trainer:**
  - Keith Bundy

- **Digital Accessibility Consultant and Trainer:**
  - Bryn Anderson

- **Project Manager on accessibility projects:**
  - Daniela Di Gianantonio

- **Web Accessibility Strategy Specialist:**
  - Stein Erik Skotkjerra

- **Web Accessibility Technology Specialist:**
  - Lars Holm Sørensen

**Signing the ADA Pledge**

Sunday, July 26, 2016 marked the 26th anniversary of the Americans with Disabilities Act (ADA). In 2015 Siteimprove employees signed the ADA pledge to become part of the nationwide celebration and recommitment to the ADA. In 2016, we encouraged new employees and others to take the pledge with us by engaging on social media and publishing a press release.

The ADA was signed on July 26, 1990 to ensure the civil rights of people with disabilities. By pledging, the Siteimprove team recommits our support to accessibility efforts worldwide and recognizes the progress made since the ADA came into effect.

**Improvements to Siteimprove’s Accessibility Service**

Updates and improvements to the Siteimprove Intelligence Platform are released every two weeks. During the past year, the Accessibility feature received a number of major upgrades, including:

- **WAI-ARIA Checks**
  WAI-ARIA is short for Web Accessibility Initiative - Accessible Rich Internet Applications. It is a technical specification that defines a way to make websites more accessible to people with disabilities and has been recommended by W3C. The Siteimprove Intelligence Platform began checking for WAI-ARIA related issues on customer websites in May 2016.

- **New Checker Engine**
  In September 2016, it is a technical specification that defines a way to make websites more accessible to people with disabilities and has been recommended by W3C. The Siteimprove Intelligence Platform began checking for WAI-ARIA related issues on customer websites in May 2016.
### Fuller Descriptions of Accessibility Issues and How to Fix Them

We continue to improve our descriptions and recommendations within our Accessibility feature to make it as straightforward as possible for clients to correct their accessibility issues on their websites. Fuller and more accurate descriptions enable customers to better understand what causes an issue, equipping them with the information they need to solve problems quickly and effectively.

### Siteimprove’s Google Chrome Accessibility Checker

In February 2017, Siteimprove launched the Siteimprove Accessibility Checker, a free extension for the internet browser Google Chrome. The free extension is available with or without a Siteimprove subscription and enable users to check individual pages for compliance issues. The extension is yet another step in Siteimprove’s mission to make the web more accessible for all.

### Human Rights

#### Goals achieved 2016/2017

- **Form accessibility partnerships**
  - We entered into an official partnership with the Norwegian Association of the Blind and Partially Sighted. They provide unmatched web accessibility consulting experience in Norway.
  - We joined W3C, the world’s leading accessibility body, which is behind the WCAG 2.0. We look forward to contributing to global accessibility standards, making the web a better place for all.
  - We became a member of Danish Standard and UNINFO, which are national standardization bodies.
  - We stepped up our membership of IAAP, the International Association of Accessibility Professionals. The IAAP is a place for accessibility professionals around the world to gather and share experiences to enrich their knowledge of accessibility.

#### Goals for 2017/2018

- We will continue to look for partnerships that can support our mission of making the web more inclusive to all.

#### Human Rights

#### Goals achieved 2016/2017

- **Facilitate networking**
  - Siteimprove continues to host networking events with the public sector in Denmark. For years, we facilitated networking for local councils, and in 2017, we have established meetings for central government employees, where web accessibility was the primary subject on the agenda.

  Anne Thyme, Accessibility Product Owner at Siteimprove, co-founded a networking group for digital accessibility under the Danish branch of Design for All Europe.

#### Goals for 2017/2018

- We will continue to facilitate networking and participate in networking groups and communities to create awareness of web accessibility both on a global and local level.
Labor Rights

Global Compact Principles 3-6:
3. The company should support the right to unionize and effectively recognize the right of collective bargaining
4. Support the eradication of all forms of forced labor
5. Support the effective eradication of all forms of child labor
6. Eradicate discrimination in respect to employment and occupation
Siteimprove
Employee Satisfaction

Our employees are our biggest asset and their happiness determines our success. It therefore brings us great joy to announce that for the second time we have been officially recognized as a top workplace by Great Place to Work®, a global research, consulting, and training firm.

We ran the Great Place to Work® survey in September 2016 for the second year running, and this time we included all of our European locations as well as our Sydney office. In Denmark, we moved up on the list of the 10 best IT workplaces, rising from number nine in 2015 to number eight in 2016. The company scored 92 percent on the Great Place to Work index.

Focus on where we can do better
We are very proud of the assessments, as they confirm our perception of Siteimprove as a great workplace. There are, however, areas where we, as an ambitious, fast growing organization, wish to improve. Increasing our focus on professional employee development is currently a main priority, which is why we hired an experienced Human Resources Director in May 2016. With her expertise, we have been able to improve our approach to employee development and address the employee wishes revealed by the satisfaction surveys, and several leadership development courses are now offered for employees with managerial responsibility.

Diversity and Anti-discrimination
Diversity is one of the key strengths at Siteimprove, as our employees come from all over the world with all sorts of different backgrounds bringing valuable knowledge and experience to our company. With Siteimprove offices in nine countries and a customer base spread across three continents, employing different nationalities comes naturally to us.

At Siteimprove, we have a dedicated team working to educate and raise awareness on the importance of fostering an open environment that supports and respects diversity. The Siteimprove Diversity and Inclusion Group is an employee-led team in Minneapolis that is open, supportive, and responsive to all diverse talent internally and externally.

Our Code of Conduct includes the following policy for equal opportunities across all of our offices:

*People are our greatest resource*
Siteimprove’s commitment to caring for people is manifested in the workplace through a variety of programs designed to promote and reward individual and team achievement. In the end, it is the efforts of our talented and skilled people all over the world that make the success of our business possible. Specifically, in matters of employment:

- It is the policy, practice, and desire of Siteimprove to provide employment opportunities to all qualified persons on an equal basis. Siteimprove will not discriminate against any employee or applicant for employment because of race, color, religion, sex, gender identity, national origin, ethnicity, age, sexual orientation, disability, marital status, veteran status, or any other characteristic protected by law in any of the terms or conditions of employment.

- Siteimprove does not use child labor. Child labor is defined as employing any person younger than the minimum age allowed by law in the jurisdiction in question. However, in no event will we knowingly employ anyone younger than sixteen (16) years of age.

- Siteimprove maintains an inclusive work environment and achieves excellence by attracting and retaining people of all backgrounds in our workforce.

- Siteimprove prohibits sexual or any other kind of harassment by any person in the workplace or while conducting Siteimprove business.

- Siteimprove strives to eliminate potential hazards from the workplace and to comply with all applicable occupational safety and health laws and standards.

- Siteimprove helps maintain a safe, healthy, and productive work environment for all Siteimprove employees by:
  - prohibiting the possession, use, sale, or transfer of illegal drugs or drug paraphernalia on Siteimprove property or time; prohibiting the conduct of Siteimprove business while under the influence of alcohol;
  - prohibiting any acts that could be perceived as violent, threatening, degrading or intimidating; and
  - requiring that any instance of drug or alcohol abuse, violence, or unlawful weapons possession be reported to management immediately.

**Employee Committees**

In our Copenhagen office, a working environment organization has been established. It consists of two levels: one level with two working environment groups and a top level consisting of a working environment committee. Each of the two groups consists of one working environment representative elected by employees and one member appointed by the executive management team. Each group represents different departments. The top level committee includes the two groups and the COO, who has the authority to approve all matters raised at work environment committee meetings.

In our Minneapolis office, the CSR Committee consists of a group of CSR Coordinators and two Office Heroes. The Office Hero position is a rotating CSR role where two employees plan a variety of activities for the Siteimprove staff working together with the CSR Coordinator. Celebrating the Olympics with a blindfolded obstacle course race, a monthly trivia, and a winter week full of events to get employees in the holiday spirit were among the activities organized by the Office Heroes and CSR Coordinators this past year.

</tr>
</tbody>
</table>
Minimizing Siteimprove’s carbon footprint

As a software-as-a-service company, we are concerned with the amount of energy used to cool our data servers. As such, we have chosen a data center that meets our expectations regarding sustainable energy consumption and optimal data security.

Our data center, Interxion, has received multiple environment awards. They support and consume energy from sustainable and low carbon sources to the greatest extent practical, and 90% of their power comes from sustainable sources, including water, solar, and wind.

Interxion operates with innovative technology that utilizes groundwater as a cooling agent for the servers. The system makes it possible to store cold winter air 70 meters below ground and utilize it for continuous cooling in the summer. This ensures the right temperature for the servers at all times, whilst minimizing the need for traditional cooling compressors.

Interxion’s continuous focus on optimizing their energy efficiency, reducing carbon emissions, and cutting waste reassures us that they are the right data center for Siteimprove.

Global Compact Principles 7-9:

7. The company should support a careful approach to environmental challenges
8. Take initiatives to promote increased environmental responsibilities
9. Encourage the development and dispersion of environmentally friendly technologies

Recycling and reducing waste

In our offices, we have procedures in place for recycling paper, cans and bottles. Employees are aware of the importance of recycling and successfully use dedicated bins for collecting paper, cans and bottles in order for it to be recycled.
At our global meet up in May 2017, we eliminated the use of plastic bottles as all 450 participants received a reusable water “pack” at the beginning of the three-day event. Clean, Danish tap water was the only water source supplied at the event, and the refillable water packs enabled participants to store and carry the water with them, eliminating the need for plastic bottles and cups.

New committee focus on the environment

The working environment committees have been assigned the task of identifying opportunities for improving our environmental efforts in our office. We want to be more effective in our use of resources, improve our recycling, and encourage employees to use environmentally-friendly technologies.

No reason for food waste

We continue to work on eliminating food waste and in 2016 we hired our own kitchen staff in our two largest offices to plan the lunch menu on a weekly basis. Better planning means better use of resources, and now any food leftovers will be taken home by employees or included in the lunch menu for the next day by our chefs. Not only does this result in minimal food waste by the kitchen, all employees now look forward to lunch as the quality of the food has increased after the arrival of our own kitchen staff.

</table>
Anti-corruption

Despite working in a low risk market, we have implemented a company-wide code of conduct. We now have a written document addressing the issues of bribery and corruption. Our global Code of Conduct describes what Siteimprove employees can and cannot do when they deal with suppliers and customers. Failure to comply with the Code of Conduct may have consequences for future employment in Siteimprove.

As a global company, Siteimprove follows the strictest ethical and business standards of behavior, regardless of the leniency of local standards. Complying with the Code of Conduct is based on the use of good judgment and seeking guidance when questions arise.

In the corporate Code of Conduct, the section “Building Business Relationships” states that “Honest dealing with customers and suppliers is essential to Siteimprove’s relationships. Giving or receiving any kickbacks, bribes, or similar payments of any sort is prohibited.” Furthermore, it informs employees of their responsibility of their dealings with government employees, to whom they are not allowed to offer any gifts, gratuity, or things of value, unless pre-approved of the Legal Department.

Finally, Siteimprove always advises vendors of the requirement to adhere to the Code of Conduct when working with us. If vendors fail to comply, they face the possibility of losing our business. Siteimprove also respects and adheres to customer or supplier policies to the extent that they do not contradict our own policies.

**Global Compact Principle 10:**

10. Businesses should work against all forms of corruption including extortion and bribery
Donations and charity

Copenhagen

This past year, the major focus in our Copenhagen office has been on hosting accessibility events. With the new EU directive on the accessibility of public websites and mobile applications, we organized a number of seminars in both eastern and western Denmark. We also hosted a webinar for those who could not attend the seminars, and for those who wanted to store the information that we provided.

In Denmark, the team launched a competition for the local councils, challenging them to improve their accessibility between the end of September and end of December. Vejen Kommune won by decreasing their number of accessibility issues by 80 percent! They were rewarded with a check of DKK 5,000 for a charity of their own choosing. We tracked the progress of all local councils during the competition, witnessing a serious decrease in accessibility issues on many public sites.

Our main event was our Global Accessibility Awareness Day event, a free event with more than 1,000 members of the public participating. Attending were Danish organizations and close-knit members of the global accessibility community and Siteimprove employees from the company’s nine global offices.

After welcoming remarks by Siteimprove CEO Morten Ebbesen, the celebrations continued with a powerful keynote speech from Canadian Jennison Asuncion, who along with Los Angeles-based web developer Joe Devon, founded the now widely celebrated GAAD initiative. Asuncion, who is legally blind, explained what led them to launch the day, as well as his personal thoughts on the future of accessibility.

Comedy and advocacy duo “The Viking and The Lumberjack” then showed the audience that it is okay to have a laugh and still be serious about accessibility, while local organizations such as The Danish Association of the Blind and Living IT Lab occupied tents where participants could learn more about their specific competencies and services.

A true highlight of the day was the second keynote speech, continued with a powerful keynote speech...
from Canadian Jennison Asuncion, who along with Los Angeles-based web developer Joe Devon, founded the now widely celebrated GAAD initiative. Asuncion, who is legally blind, explained what led them to launch the day, as well as his personal thoughts on the future of accessibility.

London

In London, the team organized a range of charity initiatives in the past year. The CSR Champions, as they are known around the office, collected used laptops and donated them to an organization in Uganda who works with sustainable agriculture. Access to computers is a small step in our fight for making the web accessible across the globe, and for the project in Uganda, computers enable farmers to work with partners abroad and bridge the global digitalization gap.

In the London office, it is a monthly occurrence to get together for a “Siteimprove Cook Off,” where employees compete in making the best version of a selected dish. A wide variety of food from different cultures have been enjoyed, and each time the team makes a contribution to a charity that they wish to support.

The team has chosen to sponsor a guide dog from birth to adult age as part of our commitment to giving back to the community and our commitment toward accessibility. Guide dogs are crucial for making the world accessible to people with disabilities.

In November 2016, all male members of the London office participated in Movember, raising money for the Testicular Cancer Foundation. Taking their social responsibility a step further, the team decided to donate more than their time and money. Together, they went to a local blood bank in London to donate blood, supporting a fantastic cause in the local community.

Minneapolis

Our Minneapolis office has also been engaged in several projects for the local community during the past year. We worked alongside Our Savior’s Housing Emergency Shelter, who work to end homelessness by providing shelter and support. Siteimprove employees spent time volunteering to prepare food and hygiene kits for the people that Our Savior’s Housing serves. We ended up providing a total of 150 meals and 80 hygiene kits for the 40 individuals they take in each night of the year.

Two of our dedicated employees, Darryl and Patrick, coach youth football teams outside of work. Several of the families are unable to afford equipment and registration fees, which led our CSR team to organize a raffle to raise funds for the young people on the football teams. Siteimprove employees ended up donating a total of $4,545 and when Siteimprove decided to match the amount a dollar for a dollar, the final amount totaled $9,090!

Darryl and Patrick have been involved with the Harrison Park Recreation Center in Minneapolis, where they primarily coach 12u and 14u football programs, for more than 4 years. It is a diverse community comprised almost entirely of minorities, and many of the young men that
Darryl and Patrick work with come from broken homes, deal with social issues, and many experience violence on a daily basis. Thus, the resources are always limited, and equipment and jerseys are hard to come by. Over the years, Darryl and Patrick have seen significant improvements in not only the boys’ football skills but also their behavior, academics, and social skills! Their efforts clearly make a difference to the boys and their families. The goal is to continue to grow these young men into responsible adults and productive members of the community.

### Social Activities and Charity
